

Bits du "mot" 1

Calcul des bits de parité :

d1, d2, d4 -> p1=

d1, d3, d4 -> p2=

d2, d3, d4 -> p3=

"Mot" 1 codé

Bits du "mot" 2

Calcul des bits de parité :

d1, d2, d4 -> p1=

d1, d3, d4 -> p2=

d2, d3, d4 -> p3=

"Mot" 2 codé

Bits du "mot" 3

Calcul des bits de parité :

d1, d2, d4 -> p1=

d1, d3, d4 -> p2=

d2, d3, d4 -> p3=

"Mot" 3 codé

Bits du "mot" 4

Calcul des bits de parité :

d1, d2, d4 -> p1=

d1, d3, d4 -> p2=

d2, d3, d4 -> p3=

"Mot" 4 codé

Expéditeur :

Message à transmettre (écrire au crayon à papier)

"Mot" 1 codé

Calcul des bits de parité (indiquer les erreurs s'il y en a) :

Suivant les parités fausses, il est possible de corriger l'erreur :

- d1, d2, d4 -> p1=
- d1, d3, d4 -> p2=
- d2, d3, d4 -> p3=

Bits du "mot" 1 décodé

"Mot" 2 codé

Calcul des bits de parité (indiquer les erreurs s'il y en a) :

Suivant les parités fausses, il est possible de corriger l'erreur :

- d1, d2, d4 -> p1=
- d1, d3, d4 -> p2=
- d2, d3, d4 -> p3=

Bits du "mot" 2 décodé

"Mot" 3 codé

Calcul des bits de parité (indiquer les erreurs s'il y en a) :

Suivant les parités fausses, il est possible de corriger l'erreur :

d1, d2, d4 -> p1=

d1, d3, d4 -> p2=

d2, d3, d4 -> p3=

Bits du "mot" 3 décodé

"Mot" 4 codé

Calcul des bits de parité (indiquer les erreurs s'il y en a) :

Suivant les parités fausses, il est possible de corriger l'erreur :

d1, d2, d4 -> p1=

d1, d3, d4 -> p2=

d2, d3, d4 -> p3=

Bits du "mot" 4 décodé
